EXPERIENCES

- Research Assistant at Mohammed 5 University's Electronics Laboratory, involved in research projects including:
 - Conducting practical experiments in electronic circuit design, construction, and testing according to established protocols.
 - Utilizing laboratory tools like oscilloscopes, signal generators, and multimeters for precise measurements and analyses.
- Contributed to the development of user-friendly web application interfaces with a diverse team.
 - Gained expertise in advanced feature development using frameworks like React.
- Additionally, I serve as a member of the Communication and Sponsorship cell in the Robotics Club "Club Robotic FSR," leveraging my communication skills for promotion and sponsorship activities.

I am committed to innovation, collaboration, and excellence, eager to contribute my diverse skills and unwavering enthusiasm to advance the organization's goals effectively.
